--	---

Bottom Line: Web Plus	Bottom Line: eMaRC Plus
<ul style="list-style-type: none"> Designed for hospital and non-hospital electronic reporting of cancer data. Reporting can be accomplished two ways: <ul style="list-style-type: none"> -Manually entering the data through the DCR Web Plus website -File upload to the DCR Web Plus website The reported files can be validated by both the DCR and the reporter. If the DCR notices problems with the records they can mark them and send them back to the reporter. Can create a NAACCR formatted file that can be received into the Central Cancer Registry database (currently Rocky Mountain). 	<ul style="list-style-type: none"> Designed to receive electronic pathology data reports from laboratories. Receive electronic path reports through PHINMS or from individual HL7 files. Uses standard HL7 messaging format and converts them to NAACCR format. Allows auto-searching of data to determine if cancer data is present. Can view pathology reports and generate abstracts. Created to assist with the path project.

**Delaware Cancer Consortium
Cancer Risk Reduction Committee**

Agenda

April 9, 2018

10:00 am - 11:30 am

The Outlook at the Duncan Center – Bradley Room 5th Floor
500 West Loockerman Street
Dover, DE

Join using your device microphone/speakers or via phone:

<https://abccreative.zoom.us/j/417864589>
